Engine Timing Belt

Replacement - Marks on Timing Belt

Timing Belts. Timing belt replacement is important for avoiding expensive engine damage. If you hear a high-pitched sound – that classic timing belt noise – coming from under your hood, have difficulty starting up your car, or can actually see that your timing belt is damaged, it's time to replace timing belt.

Timing Belts - Advance Auto Parts

The timing belt is critical for all the internal parts to be in sync. If the timing is off, you will surely know it by how the engine runs. Most timing belts need to be changed between 80-100K. The cost to do it varies, but always expect several hundred.

timing belt replacement. Most models, like those with 3.2-liter engines, do not need their timing belt replaced until they hit 92,000 miles or after six years, whichever comes first. Others can go as long as 105,000 miles before the belt has to be replaced.

How to Know When to Replace Your Timing Belt

Read Book 2e Engine Timing Belt

By definition a timing belt is a toothed belt that connects the camshaft or shafts to the crankshaft thus “timing” the top and bottom of the engine. The camshafts turn at exactly $\frac{1}{2}$ of the speed of the crankshaft to time the valve operation to the piston operation.
