Over the summer, we created a website called ExtraIQ.org. It has six courses (Algebra 2, Precalc, AP Calc AB, AP Physics 1, AP Gov, and AP HUG), and has study guides for every chapter of all those classes. We also linked youtube vids for every chapter, and they're actually interesting ones and not the boring, hour-long ones.

I'm a high schooler currently taking AP Physics C and during our review of kinematics, our teacher brought up the difference between speed and velocity. That is, speed is a scalar while velocity is a vector. So that made me wonder, is there a scalar version of higher-order derivatives? For further clarification, look at the table below:
