ASHRAE Design Guide for Air Terminal Units: Selection, Application, Control, and Commissioning. ASHRAE Design Guide for Air Terminal Units provides detailed guidance for selection, application, control, and commissioning of a common element in all-air HVAC systems--the air terminal unit (ATU). It was written with a view toward current codes, standards, and design practices and is intended to aid design engineers in sizing units while maximizing occupant comfort and energy efficiency.

### ASHRAE Design Guides

The Cleanroom Design Guidelines help identify more efficient design approaches, allowing at least a high level consideration of efficiency to be included in, and impact, a design process typically compressed by budget and schedule constraints.

### HIGH PERFORMANCE CLEANROOMS

Cleanroom design encompasses much more than conventional temperature and humidity control. Typical office building air contains from 500,000 to 1,000,000 particles (0.5 microns or larger) per cubic foot of air. A Class 100 cleanroom is designed to never allow

For both spaces, ASHRAE recommends the use of either group A (horizontal throw) or group E (vertical throw) supply air outlets. Of the two, group A outlets are the most typical for these spaces. One of the more common group A diffusers used in waiting rooms and examination rooms is the square plaque diffuser (Figure 10).
