AXOS E3-2 Intelligent PON Node Today's service providers are choosing the AXOS E3-2 system because of its reliability, lower total cost of ownership and always on operations. The system has a "deploy anywhere" design that can be mounted aerially, in a pedestal, or on a pole.

E3-2 Intelligent PON Node - Calix

Optical line terminal (OLT) is the endpoint hardware equipment located in a central office of the PON network. Its basic function is to control the flow of information in optical distribution network (ODN) to go in both directions. OLT converts the standard signals used by fiber optic service (FiOS) to the frequency and framing used by PON system.
