Most mergers and acquisitions fail to deliver their expected outcomes, yet they remain essential for growing world-class companies. It follows that those handling M&As must draw on all the tools at their disposal to improve their chances of success. Applying the techniques of business intelligence can help managers to beat the odds. Intelligent M&A looks at the full process of a merger or acquisition from start to finish, and identifies areas where business intelligence can improve the odds of a favourable outcome. Using techniques developed by governmental intelligence services and a wide range of case studies, quotations and anecdotes, the expert authors show how to build success into every phase of the deal.

Look around your business. Are your people committed to your goals? Or are they merely complying with them? Imagine how much further you could go if everyone knew where they were going and actually wanted to get there ... It's just common sense that the more committed people are to their work, the more they're going to put in and the more your business will get out. The evidence bears this out: engagement levels predict profitability. But how do you make sure people are on board? The Extra Mile shows you how to achieve that extra competitive edge by harnessing the commitment of your people, and engaging them with your aims. The Extra Mile is the result of four years of research into engagement by a joint team from Cass Business School and Towers Perrin. This ambitious and wide ranging project drew on the results of various studies and surveys which together totalled 33 million respondents. These hard-hitting statistics were supplemented by more than 50 in-depth interviews with executives and leaders drawn from a variety of business sectors. You will hear from some of them in their own words in this compelling book which distils the results of the research and the interviews into a compelling and engaging read that will make managers think again about how to get their teams to go that all-important extra mile.

For the first time, this book offers astrologers: Paran Maps and Star Phases for over 60 stars; new insights into the natal use of fixed stars, as well as their use in mundane astrology; extensive appendices of Heliacal Rising and Acronychal Settinggraphs and tables so that, for any given location, the dates of these risings and settings can be found; a list of 176 stars with their 21st century Ptolemaic precessed positions versus their commonly-considered positions based on Ulugh Beg's methods.

A Month Of Italy...What can possibly be said about Italy that hasn't been already? Primarily, that you can enjoy it too! Refreshingly relate-able in a genre previously populated by wealthy expats and Hollywood stars, this book chronicles an ordinary family taking an extraordinary trip,

and most importantly, paves the way for you to take one of your own! With hilarious wit and fast-paced narrative, Brady thrills with honest commentary on what a trip of a lifetime actually feels like, and most endearingly, he succeeds in convincing you that not only should you take a similar one, but that you will! Within a few pages you'll be visualizing panoramic Tuscan vistas and breaking open the piggy bank, laughing as you turn the pages and dreaming of your own escape. This story is one of going slow in order to go fast; it's about rediscovering and bringing back into favor a lost art, namely, the art of vacation, and it is, or rather should be, a story about you. This book is not so much about how to travel as how to live.
