Class Item K Of Bom In Variant Configuration Sap

We will learn how to select the correct component in a BOM using Class Items. THESE ARE THE KEY POINTS. A class item is defined using Class Type 200 It contains a characteristic/s used in the class type 300. The components are assigned to the type 200 Class and have a values set. In the BOM for the KMAT material we assign the class item as a component instead of all the individual raw materials.It is entered as a class item in the BOM. No Object Dependencies needed for this method.

CLASS ITEMS IN BOMS - Configuration Workgroup

Variant parts are classified in a class, and this class which is entered in the BOM as a class item. When you configure the material, the class is replaced by a suitable variant part.
