The contributors share time-tested advice on approaches, methods, systems, and perspectives that have resulted in thriving solo and

small firm law practices in the real world. This book contains proven solutions for problems and issues that, sooner or later, every practitioner will have to face.

The ABA Journal serves the legal profession. Qualified recipients are

lawyers and judges, law students, law librarians and associate members of the American Bar Association.

Includes papers from the twentieth JURIX conference. This book covers topics such as: ontology of

the Polish Commercial Companies Code, a methodology for modeling legal workflows, content management and version management of legislation, representation of deadlines, and, an ontology for summarizing documents.

This groundbreaking work offers a first-of-its-kind overview of legal informatics, the academic discipline underlying the technological transformation and economics of the legal industry. Edited by Daniel Martin Katz, Ron

Dolin, and Michael J. Bommarito, and featuring contributions from more than two dozen academic and industry experts, chapters cover the history and principles of legal informatics and background technical concepts – including natural language processing and

distributed ledger technology. The volume also presents real-world case studies that offer important insights into document review, due diligence, compliance, case prediction, billing, negotiation and settlement, contracting, patent management, legal research, and

online dispute resolution. Written for both technical and non-technical readers, Legal Informatics is the ideal resource for anyone interested in identifying, understanding, and executing opportunities in this exciting field.

The ABA Journal serves the legal profession. Qualified recipients are lawyers and judges, law students, law librarians and associate members of the American Bar Association.

This casebook introduces students to the principles of estate planning and challenges them to analyze simulated client scenarios.

Featuring a case-study and problems approach in which the principles of estate planning are first introduced and then demonstrated through student analysis of short exercises and simulated client situations. A forms supplement on a CD is an

additional tool for giving students practice with drafting exercises.
