E-Mail For Dummies: Levine, John R., Baroudi, Carol ...

The email program combines the text you wrote (the body) with the recipient, subject, date, and time (the header). Your email program (the client) then sends the message off to an email server by using the Simple Message Transfer Protocol, or SMTP. The email server is basically a program running on another computer.

How E-Mail Works - dummies

1 Open Windows Mail and click the Create Mail icon from the program's menu. If you don't see a Create Mail icon along the top, click the File menu, select New, and choose Mail Message. A New Message window appears. To send a quick e-mail to somebody in your Contacts folder, right-click his or her name, choose Action, and select Send E-Mail.

Write and Send an E-Mail - dummies

An email account is a username/password combination that gives you access to a mailbox.. The mailbox is the location where email is stored and is usually spit into folders. You can liken a mailbox to a filing cabinet. The mailbox will always be located on an email server belonging to your email provider e.g. Yahoo.. The email address is a label attached to the mailbox and is used for ...
