Ethics: History, Theory, and Contemporary Issues, Fifth Edition, features sixty-nine selections organized into three parts, providing instructors with great flexibility in designing and teaching a variety of courses in moral philosophy. Spanning 2,500 years of ethical theory, the first part, Historical Sources, ranges from ancient Greece to the twentieth century. It moves from classical thought through medieval views to modern theories, culminating with leading nineteenth- and twentieth-century thinkers. The second part, Modern Ethical Theory, includes many of the most important essays of the past century. The discussion of utilitarianism, Kantianism, egoism, and relativism continues in the work of major contemporary philosophers, while landmark selections reflect concern with moral language and the justification of morality. The concepts of duty, justice, and rights are explored, as well as recent views on cultural relativism and an ethic influenced by feminist concerns. In the third part, Contemporary Moral Problems, the readings present the current debates over abortion, euthanasia, famine relief, animal rights, environmentalism, and the use of torture in interrogations, as well as essays on death and the meaning of life. Wherever possible, each reading is printed in its entirety. The fifth edition features new readings from Cicero, Barbara Herman, and Judith Jarvis Thomson; an expanded selection from Joseph Butler's Fifteen Sermons; and a new translation of Kant's Groundwork for the Metaphysics of Morals. In addition, the book is supplemented for the first time by a robust support package. An Instructor's Resource CD contains reading summaries, essay questions, multiple-choice and true/false questions, PowerPoint-based lecture outlines, and relevant website links. A Companion Website at www.oup.us/cahn provides most of the material from the Instructor's Resource CD along with student resources including interactive self-quizzes, questions for discussion, and helpful links.

This is a collection of readings in ethics and moral philosophy. The book gives instructors flexibility in structuring their ethics courses, allowing them to choose material from historical selections. This edition includes selections on issues such as euthanasia, abortion, and the death penalty.

In order to provide the highest level of care to patients and clients, health professionals need a sound knowledge and understanding of healthcare ethics. *Foundations of Healthcare Ethics: Theory to Practice* focuses on the philosophical concepts underpinning contemporary ethical discourse for health professionals, and arms both students and professionals with the knowledge to tackle situations of moral uncertainty in clinical practice. Specially written to provide an in-depth study into the theoretical foundations of healthcare ethics, it covers a range of normative ethical theories, from virtue ethics to utilitarianism, while also investigating their application to contemporary issues in health care and society. While ethics has been addressed in the health care literature, relatively little attention has been paid to the subject in the field of social care. This book redresses the balance by examining theory, research, policy and practice in both fields. The analysis is set within the context of contemporary challenges facing health and social care, not only in Britain but internationally. Contributors from the UK, US and Australia consider ethical issues in health and social care research and governance; interprofessional and user perspectives; ethics in relation to human rights, the law, finance, management and provision; key issues of relevance to vulnerable groups such as children and young people, those with complex disabilities, older people and those with mental health problems and lifecourse issues - ethical perspectives on a range of challenging areas from new technologies of reproduction to euthanasia. This book is intended for academics, students and researchers in health and social care who need an up-to-date analysis of contemporary issues and debates. It will also be useful to practitioners in the public, private and voluntary sectors, including social workers, community workers, those working in the fields of disability and mental health and with older people.
