FANGS OF THE WOLF WORLD At one time Race Cargill had been the best Terran Intelligence agent on the complex and mysterious planet of Wolf. He had repeatedly imperiled his life amongst the half-human and non-human creatures of the sullen world. And he had repeatedly accomplished the fantastic missions until his name was emblazoned with glory. But that had all seemingly ended. For six long years he'd sat behind a boring desk inside the fenced-in Terran Headquarters, cut off there ever since he and a rival had scarred and ripped each other in blood-feud. But when THE DOOR THROUGH SPACE swung suddenly open, the feud was on again--and with it a plot designed to check and destroy the Terran Empire.

His resume of roles includes Macbeth, Cyrano de Bergerac, Ebenezer Scrooge and Oedipus Rex. His career has encompassed theatre and television in England, Canada and the United States. With a gift for developing offbeat characters, Barry Morse has had a prolific acting career, and the story of his life is a veritable history of 20th century theatre from the days before World War II through the early 21st century. In this memoir Morse traces his life and career, including his years at the Royal Academy of Dramatic Art, his radio jobs with the BBC, his 60-year marriage to actress Sydney Sturgess and their years together in the Court Players, his roles on television shows (The Fugitive, Space: 1999), and his acquaintance with literary lights (George Bernard Shaw) and screen stars (Robert Mitchum and Peter Cushing). Photographs from the Morse family collection are included.

The unpredictable cosmic entity known only as Q has plagued Captain Jean-Luc Picard and the crew of the Starship Enterprise™ since their very first voyage together. But little is known of Q's mysterious past or that of the unearthly realm from which he hails. Now Picard must learn Q's secrets -- or all of reality may perish! Ever since its discovery, the great galactic barrier has impeded humanity's exploration of the universe beyond the Milky Way. Now a brilliant Federation scientist may have found a way to breach the barrier, and the Enterprise is going to put it to the test. The last thing Picard needs is a return visit from an omnipotent troublemaker so, naturally, Q appears. But Q has more in mind than his usual pranks, and while the Enterprise struggles to defeat a powerful inhuman foe, Captain Picard must embark on a fantastic odyssey into the history of the Q Continuum itself, with the fate of the galaxy hanging in the balance.

The basis of the 2014 award-winning feature-length documentary! A revealing and dramatic look at the inside of the American Space Program from one of its pioneers. Eugene Cernan was a unique American who came of age as an astronaut during the most exciting and dangerous decade of spaceflight. His career spanned the entire Gemini and Apollo programs, from being the first person to spacewalk all the way around our world to the moment when he left man's last footprint on the Moon as commander of Apollo 17. Between those two historic events lay more adventures than an ordinary person could imagine as Cernan repeatedly put his life, his family and everything he held dear on the altar of an obsessive desire. Written with New York Times bestselling author Don Davis, The Last Man on the Moon is the astronaut story never before told - about the fear, love and sacrifice demanded of the few men who dared to reach beyond the heavens for the biggest prize of all - the Moon.

Far from Earth, on a ship carrying the 13th and 14th generations of descendants from the original crew, life is short. You are born, learn the tasks needed to keep the ship running, help breed and train the next crew - and your death is ordered by the computer in charge. Gregson, chief of the psych-police, makes sure the computer's death-sentences are carried out quickly and painlessly. His duty is a sacred trust. He knows the intricacies of the system, how it works . . . and how it can be subverted. He is growing old. Rebellious. He also knows his name will soon come up in the computer for elimination. And he has no intention of carrying out his own death-sentence!

"His reputation for fast-moving and colourful SF writing is unmatched by anyone in Britain." Michael Moorcock

The academy is in crisis. Students call for speakers to be banned, books to be slapped with trigger warnings and university to be a Safe Space, free of offensive words or upsetting ideas. But as tempting as it is to write off intolerant students as a generational blip, or a science experiment gone wrong, they've been getting their ideas from somewhere. Bringing together leading journalists, academics and agitators from the US and UK, Unsafe Space is a wake-up call. From the war on lad culture to the clampdown on climate sceptics, we need to resist all attempts to curtail free speech on campus. But society also needs to take a long, hard look at itself. Our inability to stick up for our founding, liberal values, to insist that the free exchange of ideas should always be a risky business, has eroded free speech from within.
