Solutions to B. Mendelson: Introduction to Topology. This book is meant to cover a basic topology course for undergraduates and I found it very approachable even with my limited background in pure math.

Moreover, being about 200 pages long and published by Dover, it costs the equivalent

Mendelson discusses metric spaces, paying particular attention to various distance functions which may be defined on Euclidean  $n$ -space and which lead to the ordinary topology. Chapter 3 takes up the concept of topological space, presenting it as a generalization of the concept of a metric space.
