Therefore, there has not been an infinite regression of creations. By definition, the Christian God never came into existence; that is, He is the uncaused cause (Psalm 90:2). He was always in existence, and He is the one who created space, time, and matter. This means that the Christian God is the uncaused cause and is the ultimate creator.

And to make the claim, as did the late Christopher Hitchens (who I deeply respect for his exposure of injustice), that there is no Creator/Designer because Hitchens did not approve of the way that eyes are designed, is also the pathetic voice of ego; it is the refusal to say "thank you" for the gift of life and the miracle of sight.

God is not the Creator, claims academic

A creator deity or creator god is a deity or god responsible for the creation of the Earth, world, and universe in human religion and mythology. In monotheism, the single God is often also the creator. A number of monolatristic traditions separate a secondary creator from a primary transcendent being, identified as a primary creator.

Few of us can venture outside on a clear, dark night and not pause for a silent, reflective look at the stars. For countless centuries people have felt a sense of wonder about the heavens. How did our universe come into being? Has it always been here? Is our existence due to random chance or supernatural design? Is God "out there"? If so, what is He like? Traditionally, the church has answered such questions with Scripture, while science has contributed theories and formulas of its own. Torn between a deep respect for church doctrines and an intellectual need for answers that support what their senses are telling them, many Christians have avoided such discussions altogether. Actually, the two sides are no longer that far apart. In *The Creator and the Cosmos*, astrophysicist Dr. Hugh Ross explains how recent scientific measurements of the universe have clearly pointed to the existence of God. Whether you're looking for scientific support for your faith or new reasons to believe, *The Creator and the Cosmos* will enable you to see the Creator for yourself.

Highlights various manmade inventions and shows that their origins are in things that God created first.

'My road to atheism was paved by science . . . But, ironically, so was my later journey to God.' ---Lee Strobel During his academic years, Lee Strobel became convinced that God was outmoded, a belief that colored his ensuing career as an award-winning journalist at the Chicago Tribune. Science had made the idea of a Creator irrelevant---or so Strobel thought. But today science is pointing in a different direction. In recent years, a diverse and impressive body of research has increasingly supported the conclusion that the universe was intelligently designed. At the same time, Darwinism has faltered in the face of concrete facts and hard reason. Has science discovered God? At the very least, it's giving faith an immense boost as new findings emerge about the incredible complexity of our universe. Join Strobel as he reexamines the theories that once led him away from God. Through his compelling and highly readable account, you'll encounter the mind-stretching discoveries from cosmology, cellular biology, DNA research, astronomy, physics, and human consciousness that present astonishing evidence in *The Case for a Creator*. Also available in mass market and audio CD editions.

The renowned science writer, mathematician, and bestselling author of *Fermat's Last Theorem* masterfully refutes the overreaching claims the "New Atheists," providing millions of educated believers with a clear, engaging explanation of what science really says, how there's still much space for the Divine in the universe, and why faith in both God and empirical science are not mutually exclusive. A highly publicized coterie of scientists and thinkers, including Richard Dawkins, the late Christopher Hitchens, and Lawrence Krauss, have vehemently contended that breakthroughs in modern science have disproven the existence of God, asserting that we must accept that the creation of the universe came out of nothing, that religion is evil, that evolution fully explains the dazzling complexity of life, and more. In this much-needed book, science journalist Amir Aczel profoundly disagrees and conclusively demonstrates that science has not, as yet, provided any definitive proof refuting the existence of God. *Why Science Does Not Disprove God* is his brilliant and incisive analyses of the theories and findings of such titans as Albert Einstein, Roger Penrose, Alan Guth, and Charles Darwin, all of whose major breakthroughs leave open the possibility—

and even the strong likelihood—of a Creator. Bolstering his argument, Aczel lucidly discourses on arcane aspects of physics to reveal how quantum theory, the anthropic principle, the fine-tuned dance of protons and quarks, the existence of anti-matter and the theory of parallel universes, also fail to disprove God.

What is mysticism? Is there anything similar in the spiritual lives of people despite the distinct differences and variety of organised religious traditions? Are the mystics useless to humanity on the grounds that they live secluded lives? This book unfolds certain hidden truths regarding mysticism and mystics and their contribution to humanity.

#1 NEW YORK TIMES BESTSELLER When and how did the universe begin? Why are we here? What is the nature of reality? Is the apparent “grand design” of our universe evidence of a benevolent creator who set things in motion—or does science offer another explanation? In this startling and lavishly illustrated book, Stephen Hawking and Leonard Mlodinow present the most recent scientific thinking about these and other abiding mysteries of the universe, in nontechnical language marked by brilliance and simplicity. According to quantum theory, the cosmos does not have just a single existence or history. The authors explain that we ourselves are the product of quantum fluctuations in the early universe, and show how quantum theory predicts the “multiverse”—the idea that ours is just one of many universes that appeared spontaneously out of nothing, each with different laws of nature. They conclude with a riveting assessment of M-theory, an explanation of the laws governing our universe that is currently the only viable candidate for a “theory of everything”: the unified theory that Einstein was looking for, which, if confirmed, would represent the ultimate triumph of human reason.

Ph.D. expert in astronomical and aeronautical engineering provides good news for believers - new scientific research supports the idea that the universe was created by God.

You are holding in your hands deadly dynamite. Yes. You have just purchased one of the most powerful life changing and enhancing Book. No other book will change your perception if you don't digest it by reading it. READ THIS Book. You will encounter ideas herein that are stimulating, thought-provoking, candid and spine -tingling. Yet they are true. You will be shown how to separate truth from religious and popular fiction. This book will take out the mystery of God. For God is not the Creator! Finally giving you unique satisfaction from facts you need to make important life decisions. You will be challenged and be excited after all. The problem of why the Creator created the universe still troubles thinking men and women; but if we cannot know why, we can at least know that He did not bring His worlds into being to meet some unfulfilled need in Himself, as a man might build a house to shelter against the winter cold or plant a field of rupoko to provide him with necessary food. The word necessary is wholly foreign to the Creator. Since He is the Power that is supreme over all, it follows that the Creator cannot be elevated. Nothing is above Him, nothing beyond or below Him. Any motion attributed to His direction or elevation is from us as creatures that are away from Him, in descent. He holds His position out of Himself and by leave of none. As no one can promote Him, so no one can degrade Him. It is clear that He upholds all things by the word of His power. Which is the Law. How can He be raised or supported by the things He upholds? Were all human beings suddenly to become blind, still the sun would shine by day and the stars by night, for the sun and stars owe nothing to the millions who benefit from their light. So, if every human on earth becomes an atheist, it could not affect the

Creator in any way. He is what He is in Himself without regard to any other. To believe in Him adds nothing to His perfection; to doubt Him takes nothing away. It is the compound Soul that is on earth for experience Not the Creator! You are a Spirit Dwelling In matter briefly! It's Not the Creator in Actuality! the Creator is Longing for YOUR Worship is that so? Don't be too sure. That's not so. Thousands of years before colonizing and enslaving man-made religions were crafted The Creator now commonly known as God, Jesus, Allah or Jehovah was already worshipped by "Black People" in a way that is completely mocked and laughed at today. This Book sweeps away the religious rubble and will confirm for you the foundations that sustained Afrikan Civilizations for hundreds of thousands of years before any other, The claim largely by Christianity, Judaism and Islam, (Book based religions) to being true or revealed religions, spiritualities or ways of life pales into oblivion once it is proved that Indigenous people on Earth already Knew the Creator before their advent. Ancient people worshipped and lived traditional lives based on applying the Laws they had received from their Ancestor who received them from the Creator! If You are of African lineage just remember the following observation; You cannot KNOW THIS One and ONLY Original Creator if you are convinced that, Islam is an African Religion, if you believe that Jesus died for your sins or that YHVH is "God's Name." How can this be, Because YOUR True Creator Is Directly Linked To your Ancestors? Your "God" Must Look Like Your Ancestor and eventually like you. This is common sense, Logical and True. Yet we have lost it. Today it will be restored.

When La's car gets a puncture out in the countryside, the man who lives nearest proves recalcitrantly helpful. She ends up falling asleep in his armchair and wakes to intense guilt at neglecting her daughter back in Reykjavik, followed by shock at what she finds in her helper's back room - half-finished, life-size silicone women hanging from hooks. Sveinn, her host, is a craftsman; he makes sex dolls. In his workshop La is overcome with a surprising reverence, and acting on a mad notion of salvation, she steals one of the dolls for her troubled daughter Margret. For the first time ever, La finds she is a thief. And worse, when her friends and family greet her plans with incredulity, she finds that there is another more awful theft, beyond her expectations and her understanding. Bereft and adrift, how can La save her daughter from herself and what can she learn from Sveinn's loneliness? Two people who fear responsibility putting themselves in harm's way, Sveinn and La dance a fascinating dance in this striking novel from Iceland's most celebrated young novelist.

Life is your faithful servant, but if not subdued it can become a terrible master. It all depends on whether you're being a creature of creation, or if you are only reacting to creation. One creates an ideal desire, while the other perpetuates unwanted life events. This book will interpret the story of creation, which is the life changing truth for all. The beginning you read about was only a development and was not necessarily a commencement. It was the beginning of time and the creation of matter; but it wasn't the origin of life. What we call the Big bang was just a life changing event, from which mankind now seeks redemption. Creation is a replicable process, that is being performed by you in ways you're not even aware of. Inside these chapters, you will discover the answer to many of life's questions, including those of life itself. Some have the knowledge while others have the understanding; both are the forebearer of wisdom. The YouManual is a metaphysical arbiter, a non-fictional series of books to help you better understand your own Being. It is believed that if you can master yourself, you can create your own destiny. Why allow your future to be determined by fate, leave nothing to chance. You have everything you will ever need present inside you to create, because you too are a creator. The thoughts presented are reflective of the scriptures, not as physical actions but your own mental states; but remains aligned with its motivated purpose. To have knowledge of what is, what was and what will be; will allow you to better

understand the visible world and the world that is not yet made visible. We can only comprehend within the limits of our thoughts, and discuss amidst what the adequacy of our language permits. But your ability to perceive doesn't determine all that is, and this will open your mind and excite your body. Knowledge is infinite, what you know to be true is only true to the extent of the knowledge that you have. What you now know may be right, but what you don't know about it could also make it wrong. What good is having knowledge if you lack the understanding of what it is, and what value is it to understand if you don't have the knowledge to know what it means. To have both is wisdom, and in that is the truth that will set you free.
