Companies today know that they must be competitive, but precisely where, and more importantly how, to compete is not always easy to identify-until now. Compete Smarter, Not Harder explains how to prioritize market opportunities so that a company's strengths in one area can be leveraged across multiple markets. Using cutting-edge academic research and extensive industry practice, author William Putsis outlines the strategic decisions needed to determine which space provides the best margins, overall profitability, and growth potential. Details a step-by-step process for strategic prioritization, from strategic market selection to the tactics of execution, providing competitive advantage across markets Written by Doctor William Putsis, a professor of marketing, economics, and business strategy at the University of North Carolina at Chapel Hill, who has consulted and led executive development efforts with leading companies throughout the world Prioritize with conviction. Make absolutely sure that all of your hard work goes toward the right space.

Managerial economics, meaning the application of economic methods in the managerial decision-making process, is a fundamental part of any business or management course. This textbook covers all the main aspects of managerial economics: the theory of the firm; demand theory and estimation; production and cost theory and estimation; market structure and pricing; game theory; investment analysis and government policy. It includes numerous and extensive case studies, as well as review questions and problem-solving sections at the end of each chapter. Nick Wilkinson adopts a user-friendly problem-solving approach which takes the reader in gradual steps from simple problems through increasingly difficult material to complex case studies, providing an understanding of how the relevant principles can be applied to real-life situations involving managerial decision-making. This book will be invaluable to business and economics students at both undergraduate and graduate levels who have a basic training in calculus and quantitative methods.
