This book contains biographical sketches of 83 people, with particular attention paid to moments that changed their lives. In different ways, they all overcame an obstacle or adapted to an outside force or turned discouragement into hope. Included are actors (Humphrey Bogart, Clint Eastwood, Katharine Hepburn), comics (Woody Allen, Bob Hope), entrepreneurs (Bill Gates), presidents (Harry Truman, Jimmy Carter), and seemingly ordinary people whose lives have inspired countless others (Grandma Moses, Rosa Parks, Mother Teresa). News anchor Oprah Winfrey had been described as too emotional, too nice, too unprofessional, and too unattractive to succeed at her Baltimore television station. After her perceptive station manager transformed her from news anchor to talk show host, Oprah was in her element and on her way. Young Louis Armstrong didn't let a stay in reform school keep him down. He determined he would learn to play the cornet. This led "Satchmo" to world fame as an always affable trumpet virtuoso loved by millions. Some of the 83 knew exactly what they wanted and where they were going; others had no idea. But they all experienced major turning points that took them to greater things.

At turning points, we face decisions. Here, three of the Castle's immortals, Lightning, Simoon and Comet, relate pivotal moments of their lives. A deadly chariot race forces Lightning to choose between his lover and his family; Simoon must decide what value he places on friendship, and Jant faces the consequence of his decisions to betray others. As a bonus, three short tales of the immortals' deeds are extracted from the Histories written by Simoon. But which are myth, and which reality?

In this popular introduction to church history, now in its third edition, Mark Noll isolates key events that provide a framework for understanding the history of Christianity. The book presents Christianity as a worldwide phenomenon rather than just a Western experience. Now organized around fourteen key moments in church history, this well-received text provides contemporary Christians with a fuller understanding of God as he has revealed his purpose through the centuries. This new edition includes a new preface; updates throughout the book; revised "further readings" for each chapter; and two new chapters, including one spotlighting Vatican II and Lausanne as turning points of the recent past. Students in academic settings and church adult education contexts will benefit from this one-semester survey of Christian history.

The aim of this book is to point the reader to the underlying Story of the Bible. That Story is the thread connecting Genesis to Revelation and every book in between. It provides the context for the individual doctrines by which we do business. It will help the reader to understand their origin, purpose, and destination because the Story the Bible tells is also our story. It will tell us how the world got into the mess it is in, and how to get out of it. These are the sorts of things that form worldviews.

Examining the entire span of Jewish history by focusing on thirty pivotal moments in the Jewish people's experience from biblical times through the present—essentially the most important events in the life of the Jewish people—Turning Points in Jewish History provides “the big picture”: both a broad and a deep understanding of the Jewish historical experience. Zeroing in on eight turning points in the biblical period, four in Hellenistic-Roman times, five in the Middle Ages, and thirteen in modernity, Marc J. Rosenstein elucidates each formative event with a focused history, a timeline, a primary text with commentary as an intimate window into the period, and a discussion of its legacy for subsequent generations. Along the way he candidly analyzes various controversies and schisms arising from Judaism's encounters with power, powerlessness, exile, messianism, rationalism, mysticism, catastrophe, modernity, nationalism, feminism, and more. The book's thirty distinct and logically connected events lend themselves to a full course or to customized classes on specific turning points. Discussion questions for every chapter (some in print, more online) facilitate reflection and continuing conversation.

Although most Americans believe that the Battle of Gettysburg was the only turning point of the Civil War, the war actually turned repeatedly. Turning Points of the American Civil War examines key shifts and the context surrounding them, demonstrating that the war was a continuum of watershed events.

High persistence of state fragility (a fragility trap) suggests the presence of substantial benefits from avoiding a fall into fragility and considerable hurdles to successful exit from fragility. This paper empirically examines the factors that affect the turning points of entering and exiting from state fragility by employing three different approaches: an event study, the synthetic control method, and a logit model. We find that avoiding economic contraction is critical to prevent a country on the brink of fragility from falling into fragility (e.g., among near fragile countries, the probability of entering fragility would rise by 40 percentage points should real GDP per capita growth decline from +2.5 percent to -2.5 percent). Also, strengthening government effectiveness together with increasing political inclusion and maintaining robust economic activity should help make exit from fragility more successful and sustainable. In the current environment (the COVID-19 crisis and its aftermath), the findings suggest the importance of providing well-directed fiscal stimulus with sufficient financing, (subject to appropriate governance safeguards and well-designed policies), and protecting critical socio-economic spending to keep vulnerable countries away from being caught in a fragility trap.
