Universal basic income. A 15-hour workweek. Open borders. Does it sound too good to be true? One of Europe's leading young thinkers shows how we can build an ideal world today. "A more politically radical Malcolm Gladwell." --New York Times After working all day at jobs we often dislike, we buy things we don't need. Rutger Bregman, a Dutch historian, reminds us it needn't be this way--and in some places it isn't. Rutger Bregman's TED Talk about universal basic income seemed impossibly radical when he delivered it in 2014. A quarter of a million views later, the subject of that video is being seriously considered by leading economists and government leaders the world over. It's just one of the many utopian ideas that Bregman proves is possible today. Utopia for Realists is one of those rare books that takes you by surprise and challenges what you think can happen. From a Canadian city that once completely eradicated poverty, to Richard Nixon's near implementation of a basic income for millions of Americans, Bregman takes us on a journey through history, and beyond the traditional left-right divides, as he champions ideas whose time have come. Every progressive milestone of civilization--from the end of slavery to the beginning of democracy--was once considered a utopian fantasy. Bregman's book, both challenging and bracing, demonstrates that new utopian ideas, like the elimination of poverty and the creation of the fifteen-hour workweek, can become a reality in our lifetime. Being unrealistic and unreasonable can in fact make the impossible inevitable, and it is the only way to build the ideal world.

NEW YORK TIMES BESTSELLER The oldest cultures in the world have mastered the art of raising happy, well-adjusted children. What can we learn from them? " Hunt, Gather, Parent is full of smart ideas that I immediately wanted to force on my own kids. " —Pamela Druckerman, The New York Times Book Review When Dr. Michaeleen Doucleff becomes a mother, she examines the studies behind modern parenting guidance and finds the evidence frustratingly limited and often ineffective. Curious to learn about more effective parenting approaches, she visits a Maya village in the Yucatán Peninsula. There she encounters moms and dads who parent in a totally different way than we do—and raise extraordinarily kind, generous, and helpful children without yelling, nagging, or issuing timeouts. What else, Doucleff wonders, are Western parents missing out on? In Hunt, Gather, Parent, Doucleff sets out with her three-year-old daughter in tow to learn and practice parenting strategies from families in three of the world's most venerable communities: Maya families in Mexico, Inuit families above the Arctic Circle, and Hadzabe families in Tanzania. She sees that these cultures don't have the same problems with children that Western parents do. Most strikingly, parents build a relationship with young children that is vastly different from the one many Western parents develop—it's built on cooperation instead of control, trust instead of fear, and personalized needs instead of standardized development milestones. Maya parents are masters at raising cooperative children. Without resorting to bribes, threats, or chore charts, Maya parents rear loyal helpers by including kids in household tasks from the time they can walk. Inuit parents have developed a remarkably effective approach for teaching children emotional intelligence. When kids cry, hit, or act out, Inuit parents respond with a calm, gentle demeanor that teaches children how to settle themselves down and think before acting. Hadzabe parents are experts on raising confident, self-driven kids with a simple tool that protects children from stress and anxiety, so common now among American kids. Not only does Doucleff live with families and observe their methods firsthand, she also applies them with her own daughter, with striking results. She learns to discipline without yelling. She talks to psychologists, neuroscientists, anthropologists, and sociologists and explains how these strategies can impact children's mental health and development. Filled with practical takeaways that parents can implement immediately, Hunt, Gather, Parent helps us rethink the ways we relate to our children, and reveals a universal parenting paradigm adapted for American families.

Introducing readers to the biggest names in critical political theory today, including David Graeber and David Harvey, this tour through the world of Marxist thought also examines the state of Western society today. Original.

Human beings universally dream of a better world. For centuries they have expressed their yearning for ways of life that are free from oppression, want and fear, through philosophy, art, film and literature. In this concise and engaging book, Mark Jendrysik examines the multifarious ways utopians have posed the question of how human beings might establish justice and realize truly human values. Drawing upon a range of sources, from Plato's Republic and Thomas More's Utopia to Ursula Le Guin's The Dispossessed, he argues that, though for many utopia means 'demanding the impossible', the goals that seemed out of reach for one generation are often realized in the next. Nonetheless, he shows that, while utopian thought points toward our most noble aspirations, it also illustrates the dangers of totalitarianism, of the surveillance state and of global climate change. This engaging book will be an invaluable guide for anyone seeking to understand how, for good or ill, utopian aspirations shape our lives, even in times that seem designed to close off dreams of a better world.

This book examines the contemporary era where parents complain that children today don't do their homework because they are distracted by the Internet, texting, and video games. Texting Toward Utopia presents the writings of today's children and develops the argument that this is actually a time of mass literary, in which young people write furiously, albeit often below the adult radar. Agger argues that where texting replaces textbooks, the writing may be emoticon-laden, slangy, or terse, but it is still profound, as children (and their parents) engage in resistance and write for a better world. This book is a guide to understanding the meeting point between a new generation of children and new communication technologies.

"Jill Dolan is the theatre's most astute critic, and this new book is perhaps her most important. Utopia in Performance argues with eloquence and insight how theatre makes a difference, and in the process demonstrates that scholarship matters, too. It is a book that readers will cherish and hold close as a personal favorite, and that scholars will cite for years to come." ---David Román, University of Southern California What is it about performance that draws people to sit and listen attentively in a theater, hoping to be moved and provoked, challenged and comforted? In Utopia in Performance, Jill Dolan traces the sense of visceral, emotional, and social connection that we experience at such times, connections that allow us to feel for a moment not what a better world might look like, but what it might feel like, and how that hopeful utopic sentiment might become motivation for social change. She traces these "utopian performatives" in a range of performances, including the solo performances of feminist artists Holly Hughes, Deb Margolin, and Peggy Shaw; multicharacter solo performances by Lily Tomlin, Danny Hoch, and Anna Deavere Smith; the slam poetry event Def Poetry Jam; The Laramie Project; Blanket, a performance by postmodern choreographer Ann Carlson; Metamorphoses by Mary Zimmerman; and Deborah Warner's production of Medea starring Fiona Shaw. While the book richly captures moments of "feeling utopia" found within specific performances, it also celebrates the broad potential that performance has to provide a forum for being human together; for feeling love, hope, and commonality in particular and historical (rather than universal and transcendent) ways.

The LGBT agenda for too long has been dominated by pragmatic issues like same-sex marriage and gays in the military. It has been stifled by this myopic focus on the present, which is short-sighted and assimilationist. Cruising Utopia seeks to break the present stagnancy by cruising ahead. Drawing on the work of Ernst Bloch, José Esteban Muñoz recalls the queer past for guidance in presaging its future. He considers the work of seminal artists and writers such as Andy Warhol, LeRoi Jones, Frank O'Hara, Ray Johnson, Fred Herko, Samuel Delany, and Elizabeth Bishop, alongside contemporary performance and visual artists like Dynasty Handbag, My Barbarian, Luke Dowd, Tony Just, and Kevin McCarty in order to decipher the anticipatory illumination of art and its uncanny ability to open windows to the future. In a startling repudiation of what the LGBT movement has held dear, Muñoz contends that queerness is instead a futurity bound phenomenon, a "not yet here" that critically engages pragmatic presentism. Part manifesto, part love-letter to the past and the future, Cruising Utopia argues that the here and now are not enough and issues an urgent call for the revivification of the queer political imagination.
