The field of multiple criteria decision analysis (MCDA), also termed multiple criteria decision aid, or multiple criteria decision making (MCDM), has developed rapidly over the past quarter century and in the process a number of divergent schools of thought have emerged. This can make it difficult

Multiple Criteria Decision Analysis - An Integrated ...

Multi-criteria decision-making (MCDM) plays a critical role in many real life problems. It is not an exaggeration to argue that almost any local or federal government, industry, or business activity involves, in one way or the other, the evaluation of a set of alternatives in terms of a set of decision criteria.

Multi-Criteria Decision Making: An Operations Research ...

Multiple-criteria decision-making (MCDM) or multiple-criteria decision analysis (MCDA) is a sub-discipline of operations research that explicitly evaluates multiple conflicting criteria in decision making (both in daily life and in settings such as business, government and medicine). Conflicting criteria are typical in evaluating options: cost or price is usually one of the main criteria, and some measure of quality is typically another criterion, easily in conflict with the cost.

Multiple-criteria decision analysis - Wikipedia

The basic ingredients of these problems need to be identified in order to build decision models. There are many MCDM/A (Multi-Criteria Decision Making/Aiding) methods and multi-objective approaches. This chapter places an emphasis on the MCDM/A methods, which are more closely related to rules for making choices.
