## Download Ebook Chapter 3 Proving Statements In

### Geometry, Iman **Proofs Involving Negations ...**

From Problem 3.2 we conclude that  $n$  is even. Hence  $n = 2m$  for some integer  $m$ . Thus  $2x = (2m)^2 = 4m^2$ . Hence  $x = 2(m^2)$  and  $m^2$  is an integer. This shows that  $x$  is even. Solution to Problem 3.18. We will prove the contrapositive statement which is: If at least one of two integers,  $x$  and  $y$ , is even, then the
