Normal Accidents analyzes the social

side of technological risk. Charles Perrow

argues that the conventional

engineering approach to ensuring

safety--building in more warnings and

safeguards--fails because systems

complexity makes failures inevitable.

Normal Accidents: Living with High-Risk

Technologies is a 1984 book by Yale

sociologist Charles Perrow, which

provides a detailed analysis of complex systems from a sociological perspective. It was the first to "propose a framework for characterizing complex technological systems such as air traffic, marine traffic, chemical plants, dams, and especially nuclear power plants according to their riskiness". Perrow argues that multiple and unexpected failures are built into society's complex and tig
