Pedagogy and the Practice of Science provides the first sustained examination of how scientists' and engineers' training shapes their research and careers. The wide-ranging essays move pedagogy to the center of science studies, asking where questions of scientists' training should fit into our studies of the history, sociology, and anthropology of science.

Aware: The Science and Practice of Presence

Mental resources like determination, self-worth, and kindness are what make us resilient: able to cope with adversity and push through challenges in the pursuit of opportunities. While resilience helps us recover from loss and trauma, it offers much more than that. True resilience fosters well-being, an underlying sense of happiness, love, and peace.
