It is a field that is used everywhere, whether you are aware of it or not, every living being is directly or [...]

What is Science? The Answer to Every Mystery - TopMostBlog

2. Humpback whales have been forming mysterious 'super-groups', and we still don't know why. Back in March, never-before-seen groups of up to 200 whales were appearing off the coast of South Africa, which is weird, because seven is usually the upper limit for these solitary animals. The behaviour could be due to changes in prey availability, or because the species has been making a surprising ...
