Document ID Feature in SharePoint 2010 - SharePoint Police

Essentially each entry in a SharePoint List or a Document Library gets a number (ID). The first entry gets 1, and then it is sequential from there (incremented by 1). Benefits of the ID column. The ID number is unique. If you delete a list item or a document, it is never used again; ID Number (unique identifier) is auto-incremented for you automatically

How to add a Unique Identifier to a SharePoint list or ...

The easiest option available for you to display Unique ID fields in SharePoint is the ID field (column). It is an out of the box field that exists in both SharePoint lists and libraries. The way it works is pretty simple. The first item you create or add in your list or library gets an ID of 1, the next one 2, 3, and so on. It auto-increments itself. If the item is deleted, the ID is never re-assigned, so it is always unique. I explained how to display this ID Column in this post.

2 ways to create and display Unique ID fields in SharePoint

One of the new features of SharePoint 2010 is Document IDs, which give each document in a site collection its own unique ID. It is possible to have this Document ID added to a Word document stored inside a SharePoint library, making it extremely useful if you need to have a unique identifier printed on each of your Word documents.

Adding SharePoint 2010's Document ID to a Word document ...

SharePoint 2010 introduced the document ID feature and service, which is a site collection feature. When this feature is activated, it adds a Document ID property to all document content types and assigns a unique ID to every document uploaded to SharePoint.

Create persistent links with document IDs - SharePoint

With SharePoint 2010 this issue is resolved by the introduction of Document ID functionality. Basically, each document gets a unique ID that, regardless of its location, remains the same. This means that when you move or rename a document this ID will not change. So you end up with a static or permanent link to your documents.

SharePoint 2010 Avoiding Broken Links with Document ID ...

SharePoint 2010 has now included an excellent out-of-the-box feature that allows you to automatically assign a unique document ID to all of your documents that are uploaded to your SharePoint site. This is a site-collection scoped feature, so the document IDs are guaranteed to be unique across the site collection that the feature has been activated for.

SharePoint 2010 - Activating the Document ID Feature ...

The Document ID Service is enabled at the Site Collection level, and assigns Document IDs that are unique only within the site collection. There is a prefix available for configuration that is most useful when assigned uniquely for each Site Collection to ensure uniqueness across your web application and even farm.
