Small Finch Manual Guide

Small red finches cause ID headaches for many bird watchers. This is a male Cassin's finch. Winter is finch season, when those northern nomads sweep down in raiding parties, show up without warning, stay for an hour or a week, and disappear. They are movers, unpredictable, edgy, always peeking over the horizon.

Montana Field Guide contains a wealth of information about Montana's diverse species.

(Family) Finches - Montana Field Guide

Size & Shape. House Finches are small-bodied finches with fairly large beaks and somewhat long, flat heads. The wings are short, making the tail seem long by comparison. Many finches have distinctly notched tails, but the House Finch has a relatively shallow notch in its tail. Relative Size.

House Finch Identification, All About Birds, Cornell Lab ...

Original habitat was probably streamside trees and brush in dry country, woodland edges, chaparral, other semi-open areas. Now most commonly associated with humans in cities, towns, and farmland, especially in areas with lawns, weedy areas, trees, buildings. Avoids unbroken forest or grassland. Adaptable, colorful, and cheery-voiced, House Finches are common from coast to coast today, familiar visitors to backyard feeders.

House Finch | Audubon Field Guide

Adults have rufous sides, a white belly and a long dark tail with white edges. The eyes are red, white for birds in the southeast. Males have a dark head, upper body and tail; these parts are brown in the female. Their breeding habitat is brushy areas across eastern North America.
