The Pyramids: Their Archaeology and History: Verner ...

The Egyptian Pyramids are described as pyramid-shaped monuments, constructed mostly as funerary tombs and ceremonial complexes for the departed pharaohs during the Old Kingdom (2575 BC to 2150 BC) and Middle Kingdom (2050-1550 BC) periods. To date, approximately 118 pyramids of various definitions have been discovered across Egypt (although sources differ with some citing 138), mainly sited on the west bank of the River Nile and grouped into several clusters or pyramid fields.

The main stone used in the construction of the pyramids was limestone, and according to Live Science , the 'ramp system could contain some vital clues' as to how the Egyptians moved stone and how they were able to place huge blocks on the side of the pyramid.

Archaeologists Say They've Solved Mystery of How Pyramids ...

The Red Pyramid, also called the North Pyramid, is the largest of the three major pyramids located at the Dahshur necropolis in Cairo, Egypt. Named for the rusty reddish hue of its red limestone stones, it is also the third largest Egyptian pyramid, after those of Khufu and Khafra at Giza. It is also believed to be Egypt's first successful attempt at constructing a "true" smooth-sided pyramid.

Red Pyramid - Wikipedia
